SKILLS

- ❖ C++(DSA) ()
- ❖ LINUX,SHELL SCRIPTING
- ❖ CLOUD SERVICE(AWS)
- ❖ JENKINS

EDUCATION

- ❖ Bennett University | Second Year | 2024-28 CGPA: 9.1 | 1st year
- ❖ XII (CBSE) | Evolution International school 76.0% | 2023

ACADEMIC PROJECTS

- ❖ **Calorie Tracker**
Calorie Count Chronicles is a fitness-focused desktop application developed using Java Swing. It helps users track calories, weight, water intake, and overall fitness through an intuitive multi-tab interface. Key features include a BMI calculator, diet planning, weight tracker, water reminder, and daily calorie requirement calculator. The app aims to simplify fitness management with interactive components like charts, tables, and alerts. Future enhancements include database storage, mobile app development, and visual progress reports.
- ❖ **Audible eyes**
Audible Eyes is a simple desktop application developed to convert text-based content from PDF files into audio files using Text-to-Speech (TTS) technology. This tool is especially valuable for individuals with visual impairments or reading difficulties, as it allows them to listen to written content instead of reading it. The application supports multiple languages and enables users to save the audio output as MP3 files. This functionality significantly enhances accessibility, helping bridge the information gap for those who face barriers in accessing written material, and ultimately promotes greater independence and inclusivity.

ACHIEVEMENTS / HOBBIES

- Solved 200+ questions on leetcode
- 1200 rating on codechef
- Aws solution architect- Associate
